

AMENDMENTS TO THE CLAIMS

Claims 1-11 (Canceled)

Claim 12 (Previously Presented): A method of making a anti-laceration automobile side window glazing comprising adhering two sheets of glass adapted to fit an automobile side window with an intercalary adhesive layer, wherein

said intercalary adhesive layer has a thickness of more than 0.76 mm;

each of said two sheets of glass has a thickness of from 1.5 to 3 mm;

each of said two sheets of glass has a core compressive stress in the central zone ranging from 20 to 50 MPa; and

said glazing, in a non-intact and bent state, has a Triplex Laceration Index of 7 or less.

Claims 13-14 (Canceled)

Claim 15 (Previously Presented): The method of Claim 12, wherein said intercalary adhesive layer has a thickness of not more than 2 mm.

Claim 16 (Previously Presented): The method of Claim 15, wherein said intercalary adhesive layer has a thickness of not more than 1.90 mm.

Claim 17 (Previously Presented): The method of Claim 15, wherein said intercalary adhesive layer has a thickness of not more than 1.53 mm.

Claim 18 (Previously Presented): The method of Claim 12, wherein said intercalary adhesive layer comprises one or more layers of plastic, wherein said plastic is selected from the group consisting of polyvinylbutyral, polyurethane, RIM polyurethane, polycarbonate, poly(methyl methacrylate), polypropylene, ethylene-vinyl acetate copolymer, cycloolefinic copolymer, polyethylene, thermoplastic polyester, unsaturated heat-hardening polyester, acrylic resin, and vinyl chloride-glycidyl methacrylate copolymer.

Claim 19 (Previously Presented): The method of Claim 18, wherein said intercalary adhesive layer comprises said polyurethane; and said polyurethane is a thermoplastic polyurethane.

Claim 20 (Previously Presented): The method of Claim 18, wherein said intercalary adhesive layer comprises said polyethylene; and said polyethylene is in the form of a ionomer resin.

Claim 21 (Previously Presented): The method of Claim 20, wherein said ionomer resin is a (meth)acrylic acid and ethylene copolymer.

Claim 22 (Previously Presented): The method of Claim 18, wherein said intercalary adhesive layer comprises said thermoplastic polyester; and said thermoplastic polyester is a poly(ethylene terephthalate).

Claims 23-25 (Canceled)

Claim 26 (Previously Presented): The method of Claim 12, wherein said anti-laceration glazing comprises at least one functional layer.

Claim 27 (Previously Presented): The method of Claim 12, wherein at least one of the outer faces of the anti-laceration glazing comprises a plastic sheet.

Claim 28 (Previously Presented): An anti-laceration automobile side window glazing produced by the method of Claim 12.

Claim 29 (Previously Presented): An automobile comprising the anti-laceration automobile side window glazing of Claim 28.
